

FOR IMMEDIATE RELEASE

Ozark Aeroworks Launches New Website

Springfield, MO – Ozark Aeroworks, LLC (OZARK), an Eagle Copters, Ltd partner, is excited to announce the launch of its new website. The redesigned website offers a more user-friendly experience, showcasing OZARK’s commitment to innovation, quality, and customer service.

The new website provides visitors with easy access to essential information about OZARK’s products and services, including:

- **Engine Overhaul & Repair:** Comprehensive overhaul services for the OZARK Model T53 and RR M250 series engines.
- **Maintenance Support and Services Program (MSSP):** OZARK’s power by the hour model.
- **T53 Technical Publications:** Online distribution of T53 Engine Manuals.
- **T53 OEM Network:** Your one stop spot for a list of companies approved by OZARK to support the T53 Engine.

“We are beyond thrilled to unveil our new website” said Ken Essary, CEO at OZARK. “Our goal is to provide our customers with a seamless online experience that highlights our expertise and dedication to supporting the vertical lift community now and into the future.”

The new website features a clean and modern design, intuitive navigation, and visually appealing content. It is optimized for mobile devices, ensuring a smooth user experience across all platforms.

About Ozark Aeroworks, LLC

OZARK has been providing top quality aircraft turbine engine services to helicopter operators around the world since 2013. In 2014 OZARK partnered with Eagle Copters to help grow the

company to what has now become a highly trusted and respected organization in the aviation industry.
